Defect #	Description	Severity
1	The program sometimes crashed with unknown reason during the testing up to multiple condition operation .for examples, click on stop receiving updates in one session.	1
2	If I choose time of sharing before current time, there is no error message prompted and the sharing is still successful.	1
3	User can not logout after login to the program.	1
4	The session will not be automatically stopped after the sharer arrives at the destination.	1
5	The receiver still can see the sharer's location in the session after click "Stop Receiving Updates".	1
6	In "Select a Time" screen, increase time for one hour, click done, get a result shows up what time need ride, it should show up today at some time one hour from now, but result is not time we expected	2
7	In "Select location", user cannot delete map marks.	2

8	When logging in, the password is not encrypted as stars.	2
9	After fill up all information in start share page, transfer to share page, and then click stop sharing page, it still show up message waiting for driver and broadcast	2
10	In "select location" when first time select a location successfully, try to select other time, open "select location" again, but last time selected location not store in map.	2
11	Sharing time in one session doesn't change when current time change, it shows up the same time when session was created.	2
12	when we try to click on name part under setting page, shit logo disappears.	2
13	In choose friend page, select a friend in the list and deselect the friend. The friend is still displayed as a receiver.	3
14	"Select Time" does not display the correct time selected (use a wrong timezone).	3
15	User can share the information with himself.	3
16	In setting page, user can't change name under account section.	3
17	In setting page, user can't change phone number under account section.	3
18	In "sessions" page, information under one session is not correct, time shows up a large negative number til done sharing	3
